WHY THEFTH DEPAY

At the beginning of the last war the regulation is garding both were so at let that I had a sensent examine the needs of the Heavy were more than I had a sensent examine the mostles of the Heavy were inspected by the medical offer. The stropped is equiversally was that the macrowith the more much law enter the stropped in the first training above missional testing the more strice in the more than the more

What causes decay of teelli? Has the cause ever boun discovered?

the cause ever been discovered. In the Journal of the Augustan Denial Association, Robert It, Kesel, D.D.S., M.S., Chicago, states that 227 investigators report that denial decay begins with the destruction of the cuanted by neld. This is not a new idea as a weller in A.D. 1330 stated that decay of treth was discluded that decay of treth was discluded that decay of treth was discluded. lure.

There appear to be low factors in toolh decay, the exciting or immedi-ale cause, and the predisposing or underlying cause.

The Immeritials or exciling factors are organisms on the footh surface capable of destroying tooth substances, and material ifooth particles clinging to the teeth) which are converted into substances incinful to the tooth. Without the organisms and hoth particles there likely would be no decay.

Yet, Dr. Kessl points out "that

Yet, Dr. Kesel points out "that all fiving individuals have organisms on the tooth surfaces and most of them, at times, have upon their teeth materials that could form neglet." Why then do not all teeth items?

Teeth do not decay in some hillrectified not ascay in more improducts itespile the presence of organisms and acid farming material on the teelli, because these individuals ite not have the predisposing arunderlying conditions that chulis the predisposing and acid forganisms updated organisms and acid-forming materi-nis to start the process of dreay.

Six Pointers on Neurosis Prevention

While the cuting of mental all-ments tins reached the highest point in history, nevertheless it must be remembered that many mental cases are not cured by our present methods including the shock treatment.

went.

Why should there not be some method of preventing the development of mental ailments or preventing those with a tendency towart mental ailments becoming mental patients?

Today we see smallpox, diphtheria, scorlet fever, pernicleus nnemia, typhoid fever, diabetea prevented or centrotled. Why cannot mental ailments be prevented, particularly in the young, just as diphtheria and scurlet fever are prevented?

In an article in Boslon Number of

In an article in Boston Number of the Medicat Clinics of North Ameri-ca, Dr. Merrill Moore, in pointing out what psychiatry can do to pre-vent neurosis—patients whose odd hehavlur symptoms are not due to ony organic cause, no change in brain structure—says;

t. Parenta abould not overexcite

their children.

MOBILIZATION: Super Board Formed

President Roosevelt's appointment of Jemes F. Byrnes as director of the newly formed Office of War Mobilization means that now the home front would be marshalled be-hind the war program on a scale hitherto undreamed of.

Coming after the historic cerles of conferences between the President and Prime Minister Churchill of Britend Prime Minister Churchill of Britain the establishment of the Office of War Mobilization marked e significant milestone. For now the responsibility for production, procurement, transportation and distribution of military as well as civilian supplies, materials and products was vested in one man—James F. Byrnes and the committee working with him. That committee included Secretary of Wor Sitmson, Secretary of Navy Knox, Harry Impkins and WPB Director Donald M. fielson and Judge Fred M. Vinson who succeeded Byrnes as economic stabilization director. rector.

RUSSIA: Red Power Rises

After the Nerls had tested the Reds' metile on four separete sectors from Yeliki Luki on the north to the Caucasus on the south, the Russens themselves provided the Grewerks by hurling 150,000 infantry and tank men in a vast assault egeing the Axis Kuhan lines in the Caucasus. erresus. While early Russian accounts of

the movement were characteristically lacunic, a Berlin radio dispatch conceded that the first Russian waves had thrust the German lines back more than a mile on the Kuhan front protecting Hovorossisk and added that Hast defenses were taking a terrific bettering everywhere along their last remaining Caucasus formed. Berlin said the Reds em-phyred to dissions, at least 170 tanks, plance and strong entillery

CASUALTHUS: U. S. Lauser Light

He in Aller Hight Problem American ensually to the Division seminary of the Division seminary of the Editorian feural the scales overwhelminingly in layer of the United States. The North Afgines through your the United States 18,538 resulting, including 2,161 killed, \$,437 wounded and 5,537 mining or taken prisoner.

ing of taken prisoner.

Axis casualities amounted to 221, 000, or it times the American total, former and italien losses included 10,000 men killed and 26,400 wormled, with abother 208,000 taken prisoner. In comparison, over-all Alled losses were less than 10,000, his addition in prisoners. The Allied losses were less than 10,000,

led tosses were less than 10,000. In sidition to prisoners, the Africa captured transmission quantities of mititary supplies, including large numbers of airceaft and many easet visuals, he said. Despite small American losses Sitmann said the Tunisis rampaign had developed rothing to cause the high command to selline its manipower estimates under which the service its many is expected to total 4,200,000 men.

ALEUTIANS:

Cleanup on Attu-

Even on a senamerial committee was digesting a report that Japan would send a naval and land invawould send a navat and land trya-sion force against sontheratal United States this summer, American forces in the Aleutians were pursuing a relentless steamup of enemy detach-ments on Atto Island.

ments on Atto Island.

Purreyo: of the tidings of Jap otlensive Intentions was Kilsoo K.
Hean, Washington representative of
the Koreao Kationel Front lederation, who had established a record
for prophecy by warning two months
in advance of Jap plans to ettack
Pearl Harbor. Burden of Haan's report was that Admiral Tojo had diselosed plans for this offensive at e
party in Tokyo st which Korean
spies had been present.

In the Attu engagements, havonets

In the Attu engagements, bayonets and hand grenades in the hands of American infantrymeo had taken the place of tiench mortars and automatic rifles, as the few resisting enemy were pressed into a narrow area from which access was from area from which escape was impos-

WHITE HOUSE: African Precedent

The late Booker T. Washington had been a dinner guest of Freshdent Theodore Roosevelt in 1901, but Edwin T. Barelay, president of the Negro race to spend the night in the White House as the nation's guest.

Head of the liegro republic of Liberia founded by repatriated African freeznen after the Civil war, Barclay was repaying President Rooserelt's visit to him after the Casablanea conference last Jonussy. Including his mering with hich way. Including his meeting with high gov-ernment officies and members of the cabinet, as well as his address before the bouse and senate, President Barclay received the full honors accorded all top-ranking foreign dignitarice.

RAIL WAGES:

Nonoperators Upped

Wage increases of eight cents an bour recommended by an emergen-cy fact-finding board of the National Railway Labor board panel for more than 200,000 nonoperating employees will increase the rail industry's annual wage bill by approximately \$204,000,000, nuthoritative transportation sources estimated.

The 15 nonoperating unions had asked an increase of 20 cents an asked an increase of 20 cents an hour, with a minimum wage of 70 cents an hour and the union shop. The board declined to recommend these proposals. Subject only to approved by Stabilization Director James F. Byrnes, the board's recommendations were retroactive to February 1.

The wega increases, a report of the board said, are "the minimum noninflationary adjustments neces-sary to correct gross inequities and to ald in the effective prosecution of the wer."

'NEW DIKES':

To Stem Inflation

From the obscurity in which his retirement had chrouded him, Leon liraderson, farmer OPA director, smelged in warn the notion that "arather set of direc" is needed to dear what he called the rising tide.

There are of course some cases the called the rising tide.

There are of course some cases of threatened infiation in the United

TO YOUR

CANCER DELAY

Just as we are congratulating one-

incesuse of earter, br. Bastan great extent. However, that more could and should be tone, in fact is absolutely necessary, if we are to reduce the sener death rate, is more knowledge of earter. Thus the slogan "Fight Canses with Knowledge" is timely.

That knowledge of cancer is greatly needed is the statement in the Journal of the American Medical Association, by Drs. Charles R. Herma, Jules A. Plaot and Ashiry W. Cughterson, New Hasen, Crim.

In the study of the causes of delay

W. Cughterson, New Haven, Conn.
In the study of the courses of delay
in obtaining treatment by 155 patients, it was found that only about
one-fourth of the patients had read
about cancer and that all but two
of these had obtained their informatian from newspapers and popular
megazines. Only two admitted reading public health pamphiets.
"Delay in the diagnosis and treatment of sancer is one of the most
important factors in the fellure to
obtain results by the methods now
available—radium, X-rays and surgers."

What is considered delay insofar as the patient and physician are conserred?

This depends to some extent on This depends to some extent on location of the cancer, as a cancer on the skin or where it can be seen easily will not take as long to recognize as cancer inside the body.

Delay by the patient. This consists in having persistent symptoms for one month or longer before consulting a physician

for one month or longer before con-sulting a physician. This con-sists in the waiting for any period longer than three weeks after the potient is first seen during which a diagnosis may be amounced or a consultation with another physician or cancer specialist requested.

Salt Reduction Aid In Meniere's Disease

A recent valueble discovery is that most cases of Menlere's disease—hard of hearing, head noises, dixriness, nauses and vomiting—are due to "waterlogging" or swelling of a part of the hearing system. By cutting down on liquids and sally foods most of these cases obtain relief from these symptoms.

Just what causes this excelling on

Just what causes this swelling or waterlogging in the ear is not definitely known. Dr. W. E. Grove, Milwaukee, in Annals of Ear, Nose and Throat, suggests that the swelling may be due to allergy—sensitiveness to foods or other substances
-- just as swelling occurs in other tissues due to allergy. Sweiling may also be due to lark of certain vita-mins in the food, or to the lack of a sufficient amount of some gland ex-tract in the system.

It is fortunale that while the search for the cause of these symptoms con-tinues, so much rellef can be ob-tained by the medical treatment by histandne and by avoiding foods rich in salt.

Foods to avoid because they con-tain too much sait are: saited but-ter, ordinary bread, crackers, egge, milk, spinach, carrots, oatmesl and ell corned, pickled, smnked or sait-ed foods.

Foods that can be eaten because

There are of course some cases

wised treatment for a long time and for jotionic whose occupation inter-frees with eleining benefit from med cel or dut treatment because of in fellewing a preentitled restaur.

the content of the co

Washington Diges Army's Greatest Hazard? It's Question of Morale

Armed Services Do Everything Possible to Protect Mental Health of Servicemen; Parents Advised to Cooperate.

By BAUKHAGE

percentage of those who don the uniform succumb to that.

It's the mental hazard.

Take it from a man who met it
and who, since, has read the elarming figures which show the war's
(any war's) mental casualties.

And to meet that mental hazaed
you need just one thing—mental
health.

you need just one thing—mental health.

Let me quote a few words on the subject of morals from one of the books which the army and the newy and the wise ones in other professions say is a wonderful protection for the mental health of the boy who joins the ermy.

This has become bound it courts

John the ermy.

That book is paper bound. It costs 35 certs. It is salled "Our Armed Forces." It has a lot of pletures in it and e lot of sound mense. It is printed by the presses of the infantry Journal, 1115 17th mirset, Washington, D. C. It is not sold for credit.

proof.

And here is what it says on the subject of morals. (As I say on the air, "I'm quoting"):

air, "I'm quoting"):

"Morale is en important quelity
of citizenship in the crises of peace,
when the internal accurity of the nation is threatened. It is even more
important in war, when the very existence of the netion hangs in the
balance. It is, therefore, an objective of army and navy leadership to
build a high degree of morale in the
soldier and sailor.

About Habits

"The state of mind we call morels has its roots in long-established hab-its of thinking and acting. A student cented alone in his room, bent seceated alone in his room, bent seriously over his books, may be tackling his studies with a high degree
of morale. He believes what he is
doing is worth while. He is determined to overcome whatever difficulties the subject melter offers. He
works with a self urgs. He gives up
the picture show and the ball game
if doing so is necessary for success. If doing so is necessary for success. He has confidence in his ability to acquire the knowledge and skill he is seeking. In the undertaking of hundreds of similar duties in the ordinary routine of living is created the intangible virtue called morale. The young man who enters the armed services may therefore bring with him the basis for the morale upon which his success as a coldier and the ultimate victory of our na-tion so greatly depend.

"While morale has its roots in the character of the individual and his character of the individual and his past experience, it may be greatly attengthened by association and close co-operation with others who are engaged in the same enterprise. Morals is contagious. It is a quality easily transmilled from one persum to another. The resultence reson to another. The serviceman re-ceives his uniform. It is the symbol of his dedication. With it be beof his dedication. With it be becomes port of the great tradition. Behind him into history is a long line of those who have been so dedicated. The men who walked barefool in the snow at Valley Forge. The Green Mountain boys with Ethan Allen, thundering at the gates of Ticonderoga. Caim men in the gun lurrets et Manila Bay. Marines at Guadalcanal . . . Chateau Thierty . . . Tripoll. Helmeted filers of a torpedo squadron at Midway. Through the procession of heroes, still bright as it recedes into distant time, has been handed down the greet tradition."

There are of course some cases where the hisfamine and food treatment gives little or no relief. What can be done for these cases because the symptoms are distressing and weakening?

Surgery is now used where medical said that the alment fell, or for these who far semantic or other treasures feel accomments or other reasons remain these who far semantic or other treasures remain the same of his fellow prelitatories who couldn't adjust the medical time and the same of his fellow prelitatories who couldn't adjust the medical time and controlled reflect permanently to positions in numerous. Man, some men that is, adjusted. They took the low eye, the foods and the femporary for the low eye, the foods and the femporary for the low eye, the foods and the femporary for the low eye, the foods and the femporary for the low eye, the foods and the femporary for the low eye, the foods and the femporary for the low eye, the foods are the femporary for the low eye, the foods are the femporary for the low eye, the ine in their stride and here they part giver will be repland are obling and abding at the draft thing twee phrious. We

GOD'S EXCHEDING GREAT PROMISES

Growth in graco and in knowledga of Chrisi are as normal and expected of the child of God as bodily growth of the physical child. Tragic see is the failure of one to develop physically, it is even more distressing and sad in the apiritust realm. Yet it is a common thing in our churches, where only comparatively few believing even come to full stalure in Christ, where more have only a portial growth, and some ara forever babes in Christ.

God has made perfect provision

where to find mental food. Spiritual provision can come only from God, and we find from these verses that lie has provided not just a small portion, or a limited railing, but "all things that pertain unto life and god-liness," through the knowledge of Christ. Chrlst.

God'a provision for us in Christ has made it unnecessary to took elsewhere. Here is escape from the world'a corruption, the new nature in Christ, falth, gruce, peace, power -oil in Him.

without Christ men have only the week and disappointing help of men on which to draw. Of ouely foolish ones the Lord sold through Jeremish the prophet that they "linve committed two cvils: They have for-saken me, the fountain of living waters, and hewed them out claterns,

II. All Diligence Required (yv.

There is something that the Chris-Hon con do to insure his growth in grace. He is to be diligent, that is, a freezer. And her skipper would let anyone in the novy who came abnard eat all the lee creom ba have an carnest purpose and zeal to go shead spiritually. This colls for application and endeavor, just as progress in any other sphere of lile, and possibly more.

Fsith is the foundation of all such growth and without it there is nothing on which to build. But on it, or better, "in" it, we have oil these

Notice the ascending scale. Faith leads to virtue, that is, courogeaus, resolute Christian character. Then comes knowledge—the intelligent understanding and discernment of truth. This is bound together by temperance, meening self-control. Next is patience, that steady en-durance which keeps going in apile

The sixth note in this octave of graces is godliness, which speaks of graces is goodness, which speaks or plety, true devotion to God, and rev-erence for his name. Such a believ-er will love his brethren in all broth-erly kindness; and that leads us to

gum, a ching but may be, that little supply they had left.

"But Peggy presented she never cared for them, and every timo i came to see her, she'd allp me a pocketful. She bought and saved them every day—just something to nibble while I was out on patrol, she expinited.

"I began to feel funny about that break-through to China we were niaming. Of course the Admiral of Chriet here on earth (rend I Cor. 3;12-15).

CHAPTER YO

"She was emply except for three spe-must have discharged her Jape-must hove discharged hor landing party and been headed home. One wee dead, two were counded, and one of thees two was Jap officer.

merged and uncharted corni reef,"

"We came close to losing the 32 bont about that time," said Bulketey. "DeLong and I were riding her the night of February B, patrolling up the west coast of Batsan as usual. A little before nine o'clock we asw gun blasts on up ahead of us in the neighborhood of Bagse Bay, so we put on what speed we could to find out who was shooting at what. Incidentally, the speed waen't much, Becouse the 32 boat had had an explosion while they were cleaning that abboleur's wax out of her strainers and tanks, so that now sho was held "Dulkeley had his 45 in his hand when he jumped abourd, and im-medialely this Jap officer went to his knees and begon to call, 'Me surrender!—Me surrender!'

surrender!—Me surrender!"
"He wos tolking fost," sald Bulkekey a little grimly, "and he had
his hands stuck up very high and
sitff, end that ought to stop the
myth about how Japs are too noble
ever to surrender. I put a line
around his shoulders and we holsted
him abourd the 34 boat.
"Then I hears represended around

i'Then I began rummaging around in that studge for papera, brief caces and knepancks. I collected, among other things, the muster list of the landing party and their operations plan, before the boat sonk beneath me—Kelly pulled me into his boot as the barre anak. on the barre sank.

"The ambulance declor, gloneling at them, each the thought the Jap officer would pull through, but that there weam't much chonce for the little privote,

"You never know when you're go ing to run this something," said Bulkeley. "A couple of nights later, I was riding the 41 bost on routine potrol off the west coast of Bslaan. Wheo we began to get near to Biniplican Point, the entrance to Suble we cut II down to noe co. Suble, we cut il down to one gine, to moke the teest possible noise. Just before ien o'clock, I noise. Just before ien o'clock, I spotted a Jop ship which seemed to be lying to, neer shore. We called general quarters and began sneaking up on her—still using only one engine until we got within about Iwenly-five hundred yards. Then we gave everything the gun and reared in—but almost into a trap. Because the Japs had prepared a little welcome for us, and this ship was accumingly the bait to a trap—they had floating entanglements and wires in the woter which might foul our propellers and leare us a dead target for their botteries. We saw them just in time, and nuw we saw them just in time, and now we saw they were trying to unbolt the trop because that big ship was showing

 wake, trying to get under way, "At a thousand yards we fired our first torpride, and it had hardly hit the water before the Jap chip opened up on us with a pom-porn. They'd up on us with a pom-pom. They'd been playing possum, walting for us. But what the hell-we wanted us. But what the hell—we wanted to be sure we'd stolen the best from the trap, so we went right on in, shead of our own torpedo, and let her have another at four bundred yards. Then I gove hard rudder and as we turned sheam of her, we apprayed her tleeks with the 50'o, and every man on board eleks to the second to the seco apringed bor fleeks with the 50'o, and every man on board picked up a rise and began pumping at her—just for the hell of it—and the Japa hasta dishing it right back, but not far many esconds. Because all of a swiden—flom! It was our first for pede striking home, and picces of writching home, and picces of writching for the water all around us. The explosion give up our first.

HOUSEHOLD MEMOS ... by Lynn Chambers

Steamberry Jam . . . It's the Berries! (See Recipe Below)

Get in the Jam!

Bright little herries pushing their noses out of the greenery surrounding them mokes you think of jam and jetly time, and rightfully so, for this is the time to start putting up those berries!

Strowberries are usually the first

Strnwberries are usually the first to arrive on the canning scene, full to be discovered by by the other berries like raspbercies, cherries, and then the fruits. Don't wait until the berries you are canning sre too ripe, for those do not make the best jams and jellles.

To lusure success in jelly making,

are too ripe, for those on not make the hest jams and jellles.

To insure success in jelly making, use a commerciot pectin. There's no sugar to waste on jelly that doesn't jell, and no time to spend re-cooking juices that won't work for jelly ar jam. The recipes I'm glving this year are for smaller quantities of jam and jelly for most of us do not have too much sugar to spare on canning. on canning.
You'll like this standard recipe

You'll like this standard recipe which can be used for making several different kinds of jetly:

*Strawberry Jelly
*Ripe Sour Cherry and Red
Rhospberry Jam
*Strawberry and Pin-apple Jam
*Rhubarb Relish Recipes Given

To prepare Iruit, pit about 1 pound of fully ripe cherrles. Crush or grind thoroughly. Crush about 1 quart red raspberries. Combine fruits.

quart red raspherites. Combine fruits.

Measure sugar Into dry dish and set aside until needed. Mensura prepared fruit Into n five or six quart kettle, filling up last cup or fraction of cup with water, if necessary. Place over hottest fire, add powdered fruit pectia, and continue stirring until mixture comes to a hard boll. Pour in sugar of once, stirring eonstantly. Continue stirring, bring to a full redling boll nod boil hard i minute.

Remove from fire. Skim, pour quickly. Paraffin hot jam of once. Ever fried n rhuborb relish? You can put this lovely fruit up in this way:

WAY.

Rhubarb Relish.

(Makes 4 pints)

1 quart diced rhubarb I quart oniuns, finely cul-

4 enps brown sugae 1 labtespoon salt 1 teaspoun elinamon l leaspoon alispice i teaspoon cloves

i leaspoon ginger § leaspoon pepper

I plat vinegar Combine all ingredients and heat slowly to boiling. Simmer 45 to 50 minutes or until thick. Turn into

sherile glasses and seal with paraf-fin. Serve with meat.

One of the most delightful of Jams is the one combining our favorites, strawberries and placapple.

Strawberry and Pincapple Jam. 1Makes 10 glasses, 8 ounces each!

2 cups crushed strawberries cups crushed canned or Ireab plneapple

7 cups sugae 34 bollie commercial truit perlin 14 boille commercial truit perlin

To prepare fruit, crush completely or grind the berries. Cut fine or grind the fresh pineopple or use already canned truit. Combine fruits. Measure sugar and fruit into large kettle, mixing well. Bring to a full, rolling boil over high heat. Stir constantly during bolling. Boil hard I minute. Remove from heat and site in pectin. Stir and skim by turns for just 5 minutes to cool slightly to prevent finating fruit. Pour quickly and paraffin or seal at ence.

You have often heard It said that perfect felly or jam can be ob-

out the use of a findinger commercial sectin. But, to make good felly, the fruit must eventoin both promained acid in the right quantity in

AMERICA MAY NEVER HAVE A DICTATOR—BUT Missionary From Jap-Held

WE'RE ASKING FOR IT!

Every true American shudders at any serious contemplation of the rule of a dictator in our country . . . but even a cursory study of the democracies which have trancil and fallen will reveal that at the heart of their downfall was the failure of their peoples to realize the value of their democratic privileges, and the failure to exercise these privileges at every opportunity.

It is not a new statement that we here in America have failed miserably in respect to this quality of appreciation. That we have done so is reflected in our varied responses. Particularly has this been true in respect to voting. The American system of government is controlled, if at all, by the votes of qualified men and women. These men and women are the government of America in that they hold it within their power to elect or defeat any man who announces as a candidate for public office. And it is this process of selection and elimination by voting which has given us the right to call ourselves a free people; and it is one of the first rights of which people are deprived when the iron heel rule of dictatorship settles down upon a nation. Therefore, it is a great and important privilege to be able to vote. But what have we done about it?

For years the percentage figures of those who have voted in American elections has been discouraging when compared to the figure of those eligible to do so. But in this critical time in the life of our nation, all of our people, everywhere, should become aroused about our free principles. Whether we like to believe it or not, there are forces abroad in the world which are aimed at our destruction, and which, if they could, would deprive us of free way of life. Naturally, all of these insidious forces are depending for their success upon an America which is asleep and complacent.

Ranging all the way from apparently innocent recommendations to discontinue lodge and club meetings, the postponement of church and organization conventions, based on paltry excuse, to the more radical invitations for sedition, a steady assault is being made against the American way of life. They cannot succeed if we are alert and appreciative.

But as a case in point, one should look at the recent town elections in our county. The look should make us thoroughly ashamed: In Marlinton, with a population of around 1,600, and at a cost of \$104.20, a total of 64 persons voted in the town election on June 1-36 at one voting place, 28 at the other. This followed an advertised mass meeting attended by about 7 or 8 persons which nominated an uncontested ticket. In Durbin, at an undetermined (by us) cost, a record for the county was set by the 87 persons who voted for the Citizens Ticket. At Hillsboro, with about 200 or so eligible, 20 persons voted, costing the town something more than \$10.00. In Cass, with about 200 or so eligible, 19 persons (10 of them election officials) voted, at a cost to the town of \$42.50.

And Pocahontas county is not alone here. This is but a concrete example of a nation-wide trend.

It's a dangerous trend. Staying away from the polls in this manner may broaden out into a fan-like circle which includes staying away from church, staying away from lodge, staying away from club, staying away tram public meetings, until a subversive minority can our political and social life in all of these respins (s.

Ot case, outside of a scattering, this epistle will num cover much of America, but it is as much meant the their see for our nwn. Our first duty, howover in the those when we attempt to serve. JOHN DESCRIBES TRUE CHRISTIANS

FORCES TEXTON FAME THE TEXTS FIGURE TEXT—But if we call in the District as he is in the light, we have fellow-ship one with unching, and the blood of Jewest Christ his Son cleanagth as from all sin,—1 John 117,

Relicion and life go togethes. To hold the tenets of Christian truth in one's head and not is hare them move the heart is to deny the very faith one professes. Yet this is the danger which faces the belis ver—a temptation before which many have failen. The result is that much of "what passes for Christianity in these days is very thin stuff, very remote from the original" (Shoemaker).

maker),
John was not content with such a weak imitation, and in his writings he set up the true standard of a forgiven and transformed tife, living itself out in love and sacrificial service. If we have forgotten what God meand us to be in Christ, or are members of a church which has strayed from the true and living way, this lesson affords an opportunity for penitence and works meet thereunto. thereunto.

The true Christian life must have

1. Sin Forgiven and Life Trauslormed (I John 2:1-8).

Not only at the beginning of the Christian life is ain dealt with ond put away, but day by day-yes, moment by moment—we have the cleansing power of the blood of our Divine Addrecate.

This is of the utmost importance, for God can only use clean chan-

This is of the ulmost importance, for God can only use clean channels for the outgoing of His power and grace to the world. We know our own weakness and the defling presence of the world. But unlike the unregenerale man, we do not submit and go down; we turn to Christ for forgiveness and cleansing.

The transformation of life which The transformation of life which thus comes to the believer is shown in abedience to the commandments of God. In the early church there were those who said that if they only believed in Christ as Saviour if made no difference how they lived—and they have their tailowers in our day. they have High followers in our day.
Be sure of this, the essential thing

in Christian profession is not how you talk about Christ, but how you walk in obedience to His command-

Real Christlandly will cause us lo

It. Haled by the World and Lored by the Brethren (I John 3:13-18).

by the Brethren (I John 3:13-181.

The world, that is, unregenerate mankind, hales a genuine Christian no matter how kind and loving he may be. Why? "Because the Christian believer gives the non-believer an uncomfortable sense of inferiority. The presence of high Christian ideals in marked contrast to his own selfish policies arouses his anger and rescniment" (Douglass).

The presence of a clean, godly life in a community makes every sinner look that much blacker, and the world, the flesh, and the devil will do everything possible to break down and destroy such a testimony.

We, as Christians, should not be

down and destroy such a testimony.

We, as Christians, should not be surprised that the world hates us, in fact, we should be troubled if it does not hate us, for it our Christianity really means anything, it is distasteful to a God-hating world. Beware if sinners find nothing in your life which distresses them and convicts them of sin. convicts them of sin,

In the midst of enmity the Chris-tian is not afraid, for he is

III. Inducti by Golf and Unatraid in the World (1 John 4:15-17).

A sincere confession of Christ as A sincre contession of Christ as Saviour brings a mon into that close relationship to God whileh is ex-pressed in the words, "God shideth in blim, and he in God" (v. 15). The full depth of menning of linese words is whelessly beyond our lim.

words is abelously beyond our limited understanding, but we secept the fael by fallh and rejoice in it. We recognize that it means that we

are brought by our faith in Christ, into the very center of Ged's lave. Choist, the well beloved Sen, who alamie in that blessed place, strawe to fine the city is and there we sland In Him

CHAPTER VIII

"When we went out that nicht," and Bulkeley, "we didn't dream we were to take our final crack at the Jape off Bafaan. I took two beats—Kelly in the 34, riding raysel' with Akvrs in the 55—to see if we couldn't bag one of the Jap decroyers which the army could see in Subic Bay. They'd been driven for back, but from the highest ridge of the Beta an mountains they could still look down into Subic with their 20-powers binoculars.

tan meintalias they could still hole down into Suble with their 20-powers hinoculers.

"But the admiral had said we weren't to go into the bay. We must evan them outside. The Jeps had the bay's rim lined with guns, and it would be micide. We got entiside e! Suble about eleven o'elock, All according to plan, Kelly hid his 34 boat in a core just outside the bay, while I went into the entrance and raised a little hell—fired my machine guns so they could see the tracers, heping a Jep deateryor would fallow me out, where upon Kelly was to come out of the cover and lam a couple of torpednes into their angine reom. It didn't work. The Japs hed had all they wanted of us. But just as I was about to leave, I enw from the entrance the outline of a big ship—lied to Olongapo dock."

"The was a big one," said Akers, "marks 13 000.

tied to Olongapo disck."
"The was a big one," said Akers, "maybe 10,000 tons. A tanker, we learned the next day. So we turned bask, sheaked toward her—there was no fire on us yet—and cut leave two turpedoes. By the time they exploded, we had cleared the mouth of the bay. But from the meantains "Beliaan the army watched her burn all night, and in the morning there she was, sink at her dock."

They were our last torpedoes

They were our last torpedaea fired in defense of liatann," eak! Bulkeler. "Since December 7 we had probably sunk a bundred times our own combined tomage in enemy warrhips. While we'd last two of our six boats, neither had been hit by the enemy—both had gene aground in the dark.

"On the way back I realized that

ugreand in the dark.

"On the way back I realized that we had fired our last torpedees, except those we would need to fill our tabes for the run to China. And we had just about enough gas to get us there, with hardly a barrel to spare. If we were ever to make the run, we must make it soan. And it was getting plain that we couldn't do much mere for Patnan, which was on its last legs."

"I can tell you about the army."

which was on its last least.
"I can tell you about the army,"
said One. "I used to get bored at
Simman Cove and take trips to the
front—sometones up into the curfront—sometimes up into the cur-posts. There were a let of men in instant on Batsan, but the front-line dighting soldiers consisted, first, at about two thousand Americans, and seemed and good Sphiers. Then, about twelve hundred Fulpino asen, about twerre nubered submo-fecute—equally well trained and equally good. Lastly, they had in the fighting line about twenty-seven thomand foliphing trainers—young tide who had never worn a uniform wall a few weeks before the war

Their efficies were equally un-trained. Toward the rod, it was protessour. Tough experienced American Regular Army privates would be giving orders to Filmino grant als.

"These two threshold Americana and the twelve bundred Scouts were has the tweety building then on Ba-bana, and they were the rapped-avery time the Japa punched a hale in the time, these experienced from

"But the General explained everything when he returned from the ride, by efficially presenting Bulksley with the order decorating him with the D.S.C. We'd known about it for weeks, but this, it seemed, was the official presentation. He also congratulated the men on the fine work they had done, and handed each a package of signature. It wasn't until that night that Bulkelov told me all this had been camoulage. Fur that murning the General had called him in and told him of the new plan. Chine was out to us, all right. Because Washington had made MacArthur Commander in Chief for all the Pacific and ordered film to leave. A submarine had been suggested, but MacArthur had east Bulkeloy was the only commanding officer he know in whom he had complete confidence—he was sailag with Bunk. But he'd wested to make a trial run first, and so added the little cenemony to allay the suppletions of the men. Because were leaving Batasan in absolute secrety and very scon.

"Of course is us this means that the Chine trip—our last hope of sec-

and very moon.

"Of course is us this means that
the Chine trip—our last hope of seeing America and escaping death or
a Japaness prisen—was gone farevet. Now the MTB's were like the
rest here in the islands—the expendables who fight on without hope to
the end. So far as we know, we
would now faish up the war in the
southern islands, when the Japa got
around to mopping up the last American resistance there.

"The minute we knew we were to leave Bataan soon," continued Lieu-tenant Kelly after a pause, "ex got

"But the General explained every-thing when he returned from the

to work on the four boats. We know the trip would be tough, and the boats were old now. The engines the trip would be tough, and the boats were old now. The engines had had double the number of hours' service without their customary through overhaul and returning, so they were making half their original

speed standed to strate the bottoms and overhaul their struts, but this was done for only three. My boat's turn was last, and meanwhite il was used for patrel.

"Overhauling these motors with, out any replacement parts was a terrible Job For instance. Any task, fown parage a blob overhauls a fire-ver back to the Stales aways rebaan, and they some run ragged-overy time the Jape penched a hole in the line, those experienced freeze as the line, those experienced freeze or midd have to be threefer in the plag is confirming at time.

There there was the tiers of equip-mandima space parts. They had a few tooks hell, with their trengs. anners bled

"Her much gas could we carry! me arbestated of quantitally strongthen their, and finally decided us could take a charge on paling twenty of these fifty submittens on

"Naturally the overs gut ourloss should all those properties Since

understand it either, and were starting to speculate and gowin.

"But the General explained every thing when he returned from the ride, by efficially presenting Bulksher with the order decorating him with the D.S.C. We'd known about it for weeks, but this, it areamed, was the official presentation. He also congratulated the men in the fine work to the past of the long time—and advised them is not had any other chance to get out, by all means to take it. Meanwhile we kept on the boats all that landing-pear equipment we had assembled for the China imposed 2 any hint of it had leaked out to the crew, they would think it was still on.

on, "Meanwhile MacArthur had told Builteley that Batean would fall shortly, and Coverender would go soon after—if it didn't get bely from the States immediately. No help

abortly, and Corregids: would go soon after—if it didn't get bely from the States immediately. No bely was being sent. Apparently it couldn't be potten to us. Then the Japs could mop up the southern Philippines.

"It was a grim picture for us. But here was our last big job. MacArthur was the brains of the organisation—the only general who could take that ierritory back. The whole allied defense depended on getting him to Australia.

"Bulkeley was reporting to him every other day, but MacArthur refused to set a data for leaving—he wanted to stay as long as he could at the time the boys on Batean were back in their strongest positions—also their last-ditch defense line—and the Japs had had about all they wanted membrying with this line, and were waiting for reinforcements. But when news came that their General Yamashita was on his way with make transports, bragging he would capture MacArthur within a month, our departure date was set for March 13.

"But to keep the men occurred March 15.

March 13.

"But to keep the men occupied and also to keep our secret, we went right on with plans for developing our share hase all Stalman Cove. We histalled a good cook's galley, fixed up the mess hall, screened in everything, as though we heped to live there for months.

"We even took all our clother of We even took all our clothes off

the boats and moved them into the nips buts ashere.

nips bute ashere.

'On the fourth al March there came a nice break for me. Peggy got me word that she had been transferred to Little Baguio hospitel on Battan, refleving one of the girls who had been working too long under fire, and I get the idea of inviting her dawn to cur base for show and to spend the evening. Dr. Nelson, who had been leaking after my hand, was also on Little Baguin, and I thysted him and his gul friend, too. "You should have seen my shin

"You should have seen my ship perk up when I told them. The skip-

"You should have seen my ship perk up when I told them. The skipper was going to bring a girl aboard! They had the ship all apit and peliah, ready for the big event. My cook, Reynolds, and the Filipino mess boy were tickled pink. They were gaing to show the army! "You see the week before I'd gone over to Little Baguis—I'd had only breakfast and arrived on foet late in the afternoon for my dressing, to spend the night and walk back. But they told me, regretfully of course, of a new ruling; rations were tightening—they were down to dried fish, plain vice, and one since of bread-so absolutely no visitors could get freed at the hospital. So I went to bed supportess, gat up, watched them eat breakfast—they said how sorry they were they couldn't offer me any—hited back all those miles aver the bills, and at nowe o'check, sitting at our own mess table, ate seventies in the first and our mess table, ate seventies had could norm them out of the pan.

"New their one idea was to show

pan.

"New their one idea was to show the army what real navy haspitality can be. It's true Peggy brought the collective were out of that but they rustled the rest. It started off with full contrast of their started and their started of the rest. rustled the rest. It started off with fruit cocknail, then a real put roast of fresh meat with hereat grave, and in this a whole can of muchrooms, which they'd been hoarding for some big occasion. Then rose and canned peas and beans, a delinious apple pie, and then coffee like only we can make in the navy. There was never such a dinner. Then we sat and talted, while the little waves larged along the cove. "I tall Pegg I wanted to see her again, and soon. She and they were again, and soon. She and they were

ngain, and seen. She and they were heaping her very bary, but she might got a night off on the direction or before. There was no way I might got a night off on the internth or before. There was no may I could call het, so she said she'd get to the signal-course field telephone and ring me up about all already on the elements, when we could make a definite date.

WHEAT! Crop Prospects Dim.

Smallest U. S. whent preduction since 1936 was indicated by the Department of Agricultura in its report on June crop conditions. The department estimated winter when output at 501,702,000 bushels and spring wheat at 220,822,000, or a total of 730,524,000 compared with 881,327,000 bushels harvested last year.

year.

The crop reporting bureau pointed eal that whiter wheat has been burt by drouth in the Great Plains area and by wet weather in the Eustern Belt, Spring wheol, including a considerable acreage sown where winder wheat was killed, is now favored by generally good moisture, the bu-

ler wheat was killed, is now fairored by generally good moisture, the buten reported,
A 730,000,000 bushel wheat crop in 1943 would be about the same as the overage for the 1932-41 decade which includes the drouth years of the mid '30's. It would, however, be about 150,000,000 bushels below the average of the last five years. average of the last five years.

COAL:

Promise Fulfilled

Noted as a man who keeps his promises, Secretary Ickes fulfilled this reputation when he imposed a fine of \$1 o day on the \$30,000 mine workers who participated in the June 1-5 walkeut from garerament-operated pits.

Mr. lekes declored that before the walkout he had told the minera "we were going to fine them if they went out again." Mr. Ickes acted in his role of fed-

the miners' contracts which provide penalties if a miner fails to work without good reason.

Turming tekes' action as "n brutal application of economic sanctions,"
John L. Lewis contended that the
control had expired of the time of
the work stoppage, and "the United
Mine Workers cannol understand
how fines can be levied under the
provisions of an expired contract."

CHINA:

WAR PROFITS:

Recapture' Scanned

Whether the year-old renegotiation tow by which the government revenues "excessive was mediate from Industry would be retained or eliminated was a malier that would be largely determined by the public hearings which he house naval committee had or dered.

As the committee applied class occuling into the operations of the law, witnesses representing big and little industry described its effect on war production. Government of fields credit the contract renegotiation staints with saving the ration thus last in excess of three billion delicars.

dellars.

Deciden in undertake the laves Decision in undertake the investigation came with two measures pending liefore the house ways and means committee. One was to repeal the statute stingether and the other was to limit its use to contracts above \$550,000 rather than the present \$100,000 limitation.

RUSSIA:

Aerial Prelude

Air forays and continued to be the prelide to general 1943 land offen-sives on the Russian front es the luil that began with spring thaws will had purplished.

luit that began with apring thewe oull had persisted.

From one end of the line le the other reports indicated increasingly vigorous are battles as Nazi and Soviet planes fought it out for supremacy. Activity was reported especially pronounced to the Don river valley and noethward in the vicinity of Leningrad. Russian communiques indicated that the vicinity of Rostov had become a cometery for downed Nazi Heinkei and Junkers planes. The Reds reported likewise that in a German raid on the Volkhov front 50 miles acutheast of Leningrad, 24 plones were shot down.

Aleanwhile the Russians continued.

Meanwhile the Russians conlinued their eliacks un easiern German airdromes. In one forny the Reds reported destroying 160 German pinnes compared to a loss of 28 Russian aircraft.

ANTI-STRIKE: Penalties Promised

Penalties Promised

As the house had undertaken consideration of the compromise entiatrike bill, its sponsors declared that il would keep war plonts and mines running uninterrupted by waikouts "if noything can."

Composing differences in bills previously passed by both house and acnate, the revised measure was almed particularly at the coal wage dispule. If authorized the government to selze strike-bound mines or plants, outlawed strikes in these facilities and imposed a 30-day "coaling off" period before walkouts could be called in privately operated war industries. war ladustries.

war industries.

Penalties ranging from civil damage oults to a yeor's imprisonment and \$5,000 fine could be imposed on those who fail to carry out the measure's regulations in labor disputes or who insligate or conspire with others to aid a strike in a government-operated plant.

RIGHT HAND:

Barnch for Byrnes

Official and unufficial Washington was cheered by the naws that James F. Byrnes, war mobilization director, had drafted Bernard L. Baruch to serve as his right-hand

man.
Mr. Baruch, chairman of the World Mr. Baruch, chairman of the World Industrien board in the first World war and long an informal consultant of President Roosevelt, will serve Mr. Byrnee in an advisory capacity and will hove a "more formal connection with the government" than when he headed the President's special rubber investigating committee.

The key role which Baruch's mo-

clai rubber investigating committee.

The key rale which Baruch's mobilization of national resources played in winning the last war, plus his respect nod popularity among members of congress were clied by observers as reasons for his choice by Mr. Byrnes. The fact that the two will be working together was viewed as a harbinger of closer cooperation between the government's legislative and executive brenches and more thorough-going efficiency in the home front effort.

At least 25 per cent of American food production thin year will have to be slipped abrusd, Roy F. Hen-drickson, food distribution director of the War Food administration, disclosed, adding that the proportion may have to be still greater.
Il-udrickson told the war council

Hendrickson told the war council of the American Retail federation that "se we move this fiely and fivence, Fience, Norway and the rest of Emops we must give those belf-starved people the strength to be actively on our side."

The feel distribution clief declered that the personnel of America's milliony lucces only an everyone of about \$1 points of boot delly, whereas rivillans average believes there exist four pennse.

Washington Digest

History Will Write Details Of Lewis-Roosevelt Feud

Story Begins During 'Roaring Thirties' as the Forgotten Man Is Remembered by New Deal and CIO.

By BAUKHAGE

A Quick Look

Pick up the story in the renring thirties—the New Deal is beginning to strul its stuff. The "forgotten man" has been remainbered and he's grateful to Rossevelt.

The forgotten inborer is being remembered; half grainful to Lewis. I mean the man who couldn't because of the by-laws of the AFL,

got into a labor union may mure than be could get into the Union League club. Lowis siepped out of the AFL with his minors. The CIO was formed in 1935.

Anyhow, the Wagner act passed in 1905, (Labor's A

dreames dreams. They told their dreams to hewis, "Why not a rent labor porty. Jawn," they smilled encouragingly, "with you as the lender? We'll get rid of the democrats without linagiantion. You'll be vice president neafting.

Bul then Mr. Lewis made a great mistaks. He went to Parls. Other men have erred in that once-fair city before this. If whited it myself.) But John met another siren . . . he wilnessed the sit-down strike.

strike.

Now, frankly, this is honrany but I am told that it was Lewis brought that lilegilimain Gaille child of the proleisrint, conceived in a stronga moment of sberration, back to America. It did not thrive. It needed a more rarified almosphera than that which blows across the prairies and once flapped the covered wagon.

there is, as wo know, no feud like the feud of former friends.

Washington, D. C.

Today there eams to my desk a mimeographed sheel from the Office of Wes Information. It was feeded "The Nazi Slave Laber Society."

As I read that title, my mind who back to a very few days before this writing, nor of the days before this writing, nor of the days before this Today there came to my deck a milmeographed sheel from the Office of Wer Information. It was besided "The Nazi Slave Laber So-

As I read that title, my mind whot back to a very few days before this writing, one of the days when your capital was lease over the coal atrike from one end of Canatitution avenue to the other, and un both sides of the Potomes, I ony "Coo-stitution" avenue instead of "Pennsylvania" twhich you and t have come to feel is the main street of Washington) because this coal strike struck deep into a let of offices and bureaus beside the White House of one end of this historic theroughters and the Capitol at the other.

Naturally, Harold Ickes, in his of-

and the Capitol at the other.

Naturally, Harold lekes, in his offices looking down the mail from
that strange modernistic pits that
is the new interior building, was
concerned. He was, at that moment, responsible head of the soft
coal mining industry and the industry wasn't functioning.

Naturally the members of the War
Labor board were concerned. The
board's existence was threatened.

Two Warnies.

Two Worries

Over ocross the Potomac in that marvelous architectural schlevement, the Peotagon building, where the army is housed, officers paced the floor of their pantagonal offices. They had two warries. One: Will thank be a coal shortinge that will hold up production of important war supplies? Two: Will we have lo go out and push people around with bayoneta?

beyonets?

I haven't mentioned whal was going on al the Capilot or in the White House. Plenty, Every enemy of the admitolatrollon, every friend of the admitolatrollon who was angry at Lewis, evaryons who was fer 100 per een! proseculion of the warand they weren't necessarily different ideas—was yelling for Lewis' eyebrows and some of them were threatening the President I fee didn't bring them in (on a allver charger) for breakfast.

Inside the White House there

Inside the White House, there were meetings which, because of the presence and absence of certain persons, I would like to raport in greater datall bul I can't—that will have to be left to history.

to be left to history.

As I write these lines, I cannot predict the affermath of the action which begon lais one afternood on Juno 3 when, contrary to reports circulated earlier in the doy, a statemant was issued from the While House ordering the men bock to the mises by Juno 7. But between these lines of that statement was the story of "Franklinstein" and the creature which he created, as dramatic, if of "Franklinstein" and the creaturn which he created, as dramatle, if not as trogic, as the horror tale by the gentin Mrs. Shelly, written early in the 19th century. once flapped the cover of the covered wagon.

Mr. Lewis went to the White House, jerked the previously welcoming latchstring, and went in. But old man Vax Populi got there before him. Up to then, V. P. had been preity satisfied with things set they were under the New Deal. But things had chaoged.

In a chilly voice V. P. said; "No, Franklin, no John. No dice."

Franklin listened. John got mad. That was the end of a beautiful friendship and the reet is history. Lewis turned against the man who had made his success possible and there is, as we know, no foud like

A copy of that bank ("Franken-stein") is an my table as I writo. On the last page are the lines apoken by this strange belog which the hero had created, hoping to raise the standard of humanity but which, alas, had found lizelf helr to the human weaknesses and turned against his creator. The "being," just before it destroye itself, speaks to its creator: to its crentor:

the cremor:

... thou didst seek my extinetion that I might not cause greater
wreichedness; and if yet, in some
mode unknown to me, thou host not
ceased to think eod feet, thou
woulds! not desire against me a vengeance greater than that which I feel. Blasted as thou wert, my gony was all! superior

(You really ought to read the book—it's far superior to the movie version.)

Bul why do I bandy with this Bul why do I bandy with this ancient tain? Because I do believe that all af he build, materially or physically, creatures which come back to be the recent of John Lewis and Frenklin Roosevelt, John, bein to the pile, a man who wen to literacy, yes, to scholerally lie bein way.

Chessie Writes a Letter to the Editor

To the Editor of the Marlinton Journal

Sire

E NEW a railroad killen gels around now and then. And I have lately heard some questions asked and comments made about our railroads that have inspired me to write you this letter.

I suppose it is perfectly natural that people who see the enormous load of traffic our railroads are moving in wartime - people who watch millions of tons of freight and thousands of men in arms go rolling by-should say: "I'll bet the roads are coining money these days."

It seems to me that the truth of this question is something every American ought to know,

Nearly everyone has read or heard that during the recent years of depression the tailroads had extreme difficulty making ends meet. In the twelve years fullowing 1929, thirty seven Class I railmails sought relief from their troubles in bankruptcy. Others staggered along under heavy hurdens of deht. And the average carning out all Class I railmads, for their period, were only 2.21, on in-VI WHILLIE

But what many people its nor know Is that even in 1942, the American railreader and only a moderate return on BISTALIBERT

CHAPTER AX

"On March 10 Bulkeley mails his usual trip to see MacArthur; this lime he brought along ell his plans and charta for the trip. The General went neer and approved licen, sed also told Admirni Rockwell and his chief of staff that they were going along, which was the first they had known of the trip—they limit thought we were going to China. There was also an eminous bit of news—some hig Jap hirmalling was reported con-

we were going to China. There was also an eminous bit of news-some big Jap hermalian was reported coming down the weel coast of Luzon in our direction. If it was true, if could only be the convoy bringing General Yamashin and his reinfercements. General MacArthur told Bulkeley wa might be leaving very seen, and to come back the next day.

"That would be the eleventh of March. Bulkeley went over early in the morning and returned to us at toom. Its entited in not anly me but the other officers, Akers, Cax, and Schumacher, and for the first time showed them copies of our secret orders and the charts he had worked out for our route. He made the point that we should all keep logather, but if one broke down, the rest would go on, leaving it to make its way the beet it could."

"If we mel the enemy, we were to avid them if possible. But if they gave chase and were galuing on us so that an ettack was nec-

to avail them if possible. But if they gave chaze and were gaining on us so that an attack was necessary, the 41 boat, in which he would carry the General, his wife, and his son, would lurn and run, and my boat, since I was second in command, would lead the allack to give the others time to escape.

"The last thing he told us was that we that we were leaving that very night. He left us hard al work on last-minute preparations but would return room to complain his own.

return soon to complain his own.

"We didn't tell the men what we were to to or where we were leaving Corregidor," continued Lieutenant Kelly, but they got their orders to dump that landing-force equipment, to load all spare parts on the boats, move the crew's mess gear back into the ship's galley, and pile the decks with drams of gas.

"And while we were doing it, who should walk in but Nat Floyd of the flew York Times, exactly the

who should walk in bul Nat Floyd of the flow York Times, exactly the last gry in the werld we wanted to see. Sure, we liked him. He said he'd been up to the lines with the array, and then on a hunch, no pathicular reason, thought he'd drop in an us and see if we had any

conign'i see it with the naked eye.

"I sent a witinpered message to the englie room, ordering them to disconnect the thinlile, end to push this confluedness up with their hands as far as they would go. We now had on every possible nance of power, but the Admirel still wase't satisfact. er, but the normalished, infield, "'We're closing prelly slowly,' he

"We're closing prelly slowly," he complained.

"Privately, I doubled that we were closing at all, but I only said, 'No use puching her too hard, air."

"But about five minutes later we really were closing. Bulkeley, noticing we were prelly far behind, had reduced his speed. But, with my throttle disconnected, I couldn't reduce mine, and it look me about a minute to get a message down there telling the engiceers to take their hends off the carbureler levers and reconnect them with the coetrols on the bridge. During this minite we not only galeed on Bulkeley's boat, but overtook it and went roaring madly past.

ley's boal, but overlook il and went roaring modly past.
"In the dorkness I could see the Admiral had squared around aed was giving me a doubtful look. I could lell he thought he was riding with a madman, and t decided he would worry less it I told him the truth—lilat our maximum speed in this look was something under for this look wes something under for this bonl wes something under for-ty knots. Any Japanese destroyer could easily make this maximum of ours, as the Admiral very well knew. But all he said was 'My

knew. Bull all he said was 'My Godi' very acity to himself. ''Il happened that we were just passing an island. The Admiral glanced over.

"tlow far are we from shore, Kelly? About four miles, mir.

"Looks farilier than that to me.

"Looks farilier than that to me. Take a bow-and-beem bearing."
"'Aye, aye, sir,' I said. But of course I didn'l have any instruments. So, making the 45-degree angle with two fingers, I sighted along them to a point ahead. When we came just abeam of this point, aince we knew our awn speed, It would give us roughly our distance from shore—very roughly. The Admiral cotteed me sighting along my fingers,

'Don't you have a pelorus?' he

"'Don'l you have a pelorus?' ne said, sharply.
"'Nn, sir,' I sold.
"'H.m.m., I suppose the flag-ship has belier means?'
"'No, sir,' I said. "They don'l.'
"'ttow in hell da you navigeto?'
"By guess and by God, sir,' I said.

eerd, "'My God!" said the Admiral, and this ilme he didn't say it so solily. 'I hape,' he added wistfully, 'that we get there.'"

"At four o'clock in the morning, my engines auddenly slopped," re-called Lieutenant Kelly, "I knew the strainers were clogged with wax and rust, and it would take half an haur to clean them, which I explained to the Admiral, who was watching the ather three boats disappear aver the horizon,

""What lime will we get to the rendervous?"

rendervous?
"I medo a last mental calculation,
'About 5:30, alr.'
"Dawn, se we both knew, would
come at seven, and with 14—if the

JOHN'S COUNSEL TO CHRISTIANS LESSON TEXT-II John 6411 IN John

John H. Christian need guidance, especially is their home and shurch relationships. The aposite Johe, under the inspiration of the Holy Spirit,

wrnie the two pressured letters known to un as it and til Johe. They abound to sound apprilial, practical ndvice. Note that these two words belong together, for what is truly spiritual cannot help but be tremendously proclical and perfect for the direction of thought and life. In these letters five edmirable les-sons are taught. Let us give heed

to them. They are eppropriate to our day.

I. Set an Example Betere Your Children (II. John 4-8).

We may not like to admit it, but our children are lergely what wo make them by their training-or lack of it—in the hene. Porents here the grave and at the same time precious responsibility of being what they wont their children to be. We set the mold of their thicking and set the moid of their thicking the colleg, not only about imaterial things, but mentally and spiritually, which is far more important.

Above all we must leach them by

precept and example in love God-su-premely, and to walk after Hie commandments. Father, mother, have you done your duly? Are your chil-dren "wolking in truth" (v. 4)?

U. He an Guard Against False Teachere (Il John 7-11).

We are not to countenance take leaching even by enterinining such leachers, or having close fellowship with them. To create the impression before the world and the Church that they are "not so bud," by appenring as their friends, is to par-take of their cell works (v. 11). This is a perious matter, and one which is a problem in the Church today,

a problem in the Church loday,
Such teneliers may coully be recognized. They are optly described
by Dr. Douglass: "In all ages the
Church has been plagued by those
who want to substitute something for
pure Christian faith, or to embroider
it with bright ideas of their own concelving. Such people mey try to
strip religion of its supernatural aspect and reduce it to a merely railonalistic system. They may seek
to styly leosen the moral alondards
of the Church because their own lives
are deficient when measured by such are deficient when measured by such standards. They may try to mini-mize the leaching of the cross be-cause il staeds for sacrifice." Which agalast them, and stand against their destructive leaching.

Itt. Be Diligent in Pulling Forward True Teachers (III John 5-8). The door which should be closed agninsi false leachers should be opened wide to those who are falthful teachers of the truth.

This refers primarily to the hos-pitality of the hame, and reminds us at a grace which has been all but forgotten in these days of small npariments.

Whether we are able to open our homes to God's servants or not, we can show a Christian spirit of genulne hospitality in helping to bring them forward (v. 6) in their work. This may be done by gifts of money, by kindness shown in time of need, by a real interest la their work, by recommending them to others who

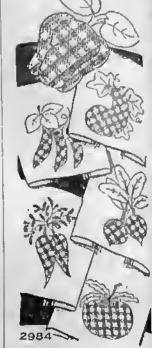

wish to hear the truth Do evenything possible, then, to hinder the false leacher, and be just an diligent to put forward the ministry at the true man of God.

IV. Do Not Trust Proud, Sett-Seeking Leadership (III John 9-11). A man may be orthodox, and in-tensely loyal to the denomination, and at the same time be a wicked one at the same time be a wicked men whose example is in be shunned. No word is said against the travhing of Diotrephes. He was not condemned for being carriers about the affairs of the church or unleithful in his attendance and described in the state of the church of the same them.

42 Loous Called

First steps in a pregram to salve the increasingly serious corn supply situation came when the government formally called leads on 47,000,000 bushets at 1042 crap corneffective July 13. The generations had previously used deliveries of grain through liquidation of 1938-44 loans to resigne the presentions of loans to restore the operations of fwo closed-down processing plants.

fwo closed-down processing plants. The corn han meve was described on "only an immediate pullfailive, not the final answer to the probfem," and it was stoted that efforts to find a schillen would continue. The government's action came as the War Food administration and Commodity Creffi corporation received a request from the Corn fadustries Research foundation for either complete lifting of fedoral palce ceilings en grain or the imposition ther complete lifting of fedoral pyles ceilings en grain or the imposition of ceifings on hogs. Meanwhilla J. B. Hutson, director of the Commodity Credit corporation, acid that 23 million bushels of privately ewned corn in groin elevators would be selved for plants manufacturing by products for wall uses unless "croms products for wat uses, unless "crops can be moved off farins,"

RUSSIA:

Orel to Forefront

A slepping-up of land activities was reported on the Russian front, with especially henvy fighting reported in the Orel sector. Here, Russian troops actending a strategic newly won buldgeheed liver reported in have beaten off sight German ed to have beaten off eight Germon

counter-altacks.

It was reported that strong forma-tions of Soviet planes had broken up German formations supporting Na21 larman houses to the Gerlank and Infaniry units. The Germans, however, were reported bringing up reinforcements in an effort to farculati the possibility of Russian fanking movements against Grel, stringle Nazi-held binso midway between Moscow and Kharkov, liesvicel fighting was reported in the vicinity of Milecask, 20 miles northeast of Orel.

Ruesian air forces continued their effects to disrupt Nazi supply conceptrations by striking af four rational impetence over which German rosil Junctions over which German supplies and reinforcenients must move for the Bryansk-Orel-Smolensk area. The functions were Roslavi, Unecha, Viadulavoka and Novosylisher,

RATIONING:

Eight New Plans

Louis J. Kroeges, Of A rationing official, itleshood that eight new instituting programs are being prepared by the Other of Price Administration and may be instituted within the next year.

the next year.

Mr. Kroeger table a house appropriatione committee that two of the ration plans will be piaced in fever immediately, but that six athers, including coal vathining, are contingent on directives from other government agencies. The two programs definitely scheduled cover coaking and healing sloves, and a new system of abiliting foods to all types at institutional overs, including factors and restaurants, which will an after consumers directly.

Except for enal, the other prospers

will not affect consumers directly. Except for end, the other prospersive rationed lienus were not listed, but Kreeger ashf they inclined goods for which the government of fleials see a ticfinite possibility of shortages in the next fless) year. Figge, milk and other foods have been mentioned recently by government food expects as possible conditates for rationing.

RUSS POLES:

Postwar Assurances

Assurances of Saviet old in ec-aloring a strong and independent Po-innd after the mar were given by Preinler Josef Sinthi of Russia,

Stalin's promise was enniathed to a measage sell to the first Congress a measage sent to the arst Congress of Pollah pairinis in Russia who Inhi him that "wa will not allow persons who strive to drive a wedge helween the Pollah people and thin Soviol union to trouble the wnier."

Observers noted that the Polish government in exilo hoil no part in the exchange of amenities helween the two penples. Russla recently the exchange of amenities lietween the two penpies. Russia recently broke off diplomatic relations with General Sikaraki's group in London, because iif charges by the Poles of Russ executions of Polish semy of-ficers and enunter-clinings by the Soviets of pro-Axis esploning by the Poles.

EUROPE:

Air Blitz Continues

Even as English Ring George V was inspeciling the Allied armed forces in North Africa, air forces of the Unifed Nations were preparing for the war's next decisive move by softening-up forsys sgninst Axis positions from western Europe to the Esstern Mediterranean.

In a single six-day offensive, firli-ish and American bombers hammered destruction on nine different major German ellies. These included Cologne, Dusseldorf, Munsler, Wilkielmshaven, Cuxhaven, Bremen, Bochun, Kiel and Obethausen, Heaviest assault was reserved for Cologne, industrial capital of the Thiladand and the third largest city in the Reich. major German ellles. bi thu Reich

In the Mediterranean, American and British bomber fleets swarmed over Stelly, attacking five major italian air bases and maintaining a Hallan air bases and maintaining a day-and-night mavathon of disaster to the Axis. The Allied filers at-tacking Sictly reported lough fighter apposition and aircuig anti-aircraft firs, contrasting sharply with the tack of Axis apposition over Pantel-

Philosophy of Governments Set Forth in New Fantasy

Antoine rie Sabit-Eximery's Delightful Falry Story, "The Little Prince," Holds More Than Artistry for Adult and Child Alike.

By HAHRMAGE

Washington, B. C. On a June dag, when a gentle fiverzo brought his event of new-nown games in through the White lines whilewe, Freedlent linesevelt and what at his desk and what shouly he a group of coverentents from a typewalten sheet. It would a firm that the cannelly fur has a firm of covered the firm of the manual property of the military converted to the military converted t

Hallon people that the utilitiesy compalga agalist them which had this palga agalist them which had this means another Albed victory, four tellerin, was the vessil of the relection of the relative that the relative the relative the relative that the relative the relative that the relative the relative that the relative that the relative the relative that th bind her are backen. There has been much ink about post-war po-ticing of the re-maile werld; little thought of the ultilascopy which will inderlie the forma which the vetora governments must fullow. To me, such a will be will be the formation of the little will be about the will be will be about the will be about th such a philipsophy is not forth in a work of pilvo faninsy. A hupeful note for antions and men is sounded in this delightful fally lalo by an author who found spiritual rebirth in the langedy of the fath of the own nation.

nation.
I refer to Antoino de Saint-Ex-ippery and his latest work, "The Lif-the Prince."
These who have read lits "Night Flight," "Wind, Sand and Hisra" and "Flight to Arena" are not sur-resent, that he could create a lajey and "Flight to Arena" are not sur-prised that he entitle create a talry tale as delicate as this. Reviewers have disagreed as to whether it is for children or for minits, it tolleve it to for both, like "Alice in Woulder-land," But the adult will find in "The Little Prince" something more than artistry unit the children will sense that, too, I faink. sense that, too, I flilink,

sense that, 100, I flink.

Saint-Exapery is a littlinal aviator who built up alght flying for the French airlines in South America, for fought against the Germana—"Flight to Arran" is the remarkable book which tells of thei experience, its is now back with the fivench army in Africa, scene of the opening of "The Little Prince."

The Prince's Story

"Six yeurs ago," the author anys, "I made a terent lamilling in the Sahara alone, a thousand intles troni So Frinces, a thousand intentron thelp, and faced the necessity of teppiring my mnior by myself within the number of days my drinking water would last. The first motoring, I was awakened by a determined but gentle voice witch snift of the property of the steep, "If you please, draw me a steep,"

So Exupery learned the story of how the Little Prince had found out what is really important in life.

The Little Ptince ta at once a delicate wiep of fancy, aomething so aheer that at moments he stems to flost like a piece of thistlettown befora your imagination—again, he has all the restliy of truth liself, he is elernet childhood, all that is gentle, and confiding and lovable, with the faint shadow of sorrow on his winsome face, he is the lag at your heartsfrings that comes when youth looks at you to wide-eyed confi-The Little Prince ta at once a delllooks at you to wide-eyed confi-dence, reaches up to take your hand—the some reinfulscent tug when you look hack and see the surprised and longing sorrow in the eyes of your own lost youth.

The Lillle Prince lived for away, The Lillie Prince lives for away, it seems, on a liny planet with three colorones so small that he cooked him breakfast on one of liem. A color planet and the Charging that the government Little Prince loved her and this bayre if her more than tripled since her first than the content of the prince loved her and ented for

Little Prince loved her and ented for het but he couldn't understand her end an to left to try to find out why. Its finally reached the earth, and here the fax taught blut.

The Little Prince had never seen a fex—"Come and play will me," he said, "I sill so inhappy," "I cannot play will you," the fex said, "I sill not understand. The Little Prince that he was looked for filenda and solved film what lame means.

World!"

World!"

works."

"I am beginning to insters and,"
said the Little Piline, "there is a
flacer. . . I think she has famed

there ; . . I limb she has famed me."

"If you have me," he for wend on, "I will be as it the sime came to white en my libe. I shall know he will be mind to she had been the mound of a she him will be different from all others. Other she sant me hirrying back underseath the ground. Yours will call me that beinds out of my furrow, And then look; you see the grain fields done yourier. I do not eat bread. Whist is of mines to ma, The grain fields any nobling to me and that is said. But you have halr field in the caler of gold. Think how we merful that will be when you have tabled one. The grain which te also golden will bring me back the Honghi of you. And f shall tove to tisten to the wint in the wheat. . ."

The for gureri at the table lydnes for a long time. "Please whatle min," he said. "I want in very much," and the falle lydnes for a long time, "Please whatle min," he said. "I want in very much," and the falle lydnes for a great many things to understand,"

"One only understands the tilings on limes," and the far, "men have

unbrahmi,"
"One only understands the things costantes," and the fix, "men have in understand may thing. They this things already made at the alope but there is no alope anywhere where one can buy friendship, and or men have my friendship, and or men have the fifth frince dat, and another day when he came hack, the

for we fill the filler frince fail, and another day whom he came back, the fox anit; "It would have been before if you had come back at the anime hour. If, for example, you come ut four n'elock in the aftermion, then at three o'chach t abuilt begin to be harry. I shall teel be because be happier and the hour allymmes. At fone n'chick, I shall niready he wir-rying unit jumping ulanit. I shall sling that hamping aloud, f shall sling you have happy f ma. But if you came has anythme, f shall nover know it what hatte my heart is to be ready in greet you." But flindly, the falth Prince but

lo go, "Ah," said the fox, "I shall cry,"

Source of Comfort

"Il is your own findt," said the Little Prince, "I never wished you sny set of harm; but you wanted to in tann you." "Yes, that is so," and the tex. "Then it has done me theol," said the fex, "he cause of the color of the whent fields,"

And there, f think, perhaps some of you may fluit comfort—in tha memories that come front the whenf fields, for the common and the heau-tiful things that remind you of someone from whom, perfinps this wor has purted you.

has pirted you.

That is only a flesh I have given you of the alory of "The tillle Ptinee" which is not written for children and you fall the children and the understanding to see how feeled. the falls of little children and the understanding to see how fragedy can being forth something which can light the long shadows which it leaves—out of the fragedy of his nation and the searchings of his own soul came this charming fantosy from the pan of the soldier with the secret he learned it from the Liftle Prince who learned it from Liftle Prince who learned it from

the for—
"It is only with the heart that one
can see rightly; what is essential is invisible to the eye."

Diary of a Broadcaster

A postcard signed by a fictitieds name, dated the day Pantelleria fell, contained fills statement;

"Haly so fat hee go! the best fer-rliary of the world: most of France; the theirest price of the war; Jugothe thirset price of the war; Jugos elavin; the greatest attalegant area in the world: Dreece and her fallands that will dictate the peace, and the first Africa, meanwhile Manachtar to Bugiwme everywhere. Hate got all cut her leet, can fight 1,000 years."

HARLITE STAPPES AND ANTERICA
AND ANTERICA
IN THESE DAYS of Intensive nathoral war stress, groups of Aineraint they or first strong ren get and
of the true effort, rather than to
the true effort, rather than to
the true of the form of the intensive of
the true effort, rather than to
the luttre. The dominating are
of the luttre. The dominating are
of the order groups is selfathered.
Hereafly i University to a speaker

It all such groups is colfabrage, licearty i lintered to a speaker sitalking on the subject of "The Labor Situation of Today." He was omplyed in the state to handle the farm labor problem and reas naturally sympathetic with the term interests. His audiotice was a going of just average Americans, including facilities, merchante, small industrialists and others who as to make up the population of a country community.

community.

In summing up, he solit that laboe, as represented by taleor leaders; farmers, as expensented by taleor leaders; farmers, as expensented by teaders of larm eigenfactions, and industry and the politicitans were all attempting to take all rantage of war conditions to further their own eads. Each group was more interested in securing a present advantage for themselves than in winning the war and the peace; that despite these conditions, we would win the war, but as o result of the group selfathness, we would lose a priced possession—the American system of tree enterprise; that those interested in limitialing in Amarica a new economic system were utilizing the selfathness of these groups to further their desire for an economic change.

The speaker's conclusions were still to proceed.

economic change,

The speaker's conclusions were quite curreet. Group selfishness, making of political capital out of the exigencies of war, will overthrow cur free entappiase system. There is happening just what At thur Balfour, the great English stateman, teld one on November 12, 1918, would happen if Anteries should become involved in another world conflict, which he could are in the then "comparatively mar future."

INFLATION

INFLATION
AND ITS CONTIGUE
WHEN WE HAVE more money than commodilies money will buy, demand pushes the price skyward and decreases money values. That is luflation. The government is altempting to control this by limiting prices and taking money from people for taxes and for the purchase of were boads. The real basis of it all is the increased mency in the peckets of workers and the policy of the government has been to keep on increasing that by a continuous raise in wages, either as direct hourty pay or as anyentime at time and conclusif pay. There is a limit to the coursey water the dam will hold. The place to remedy the danger is at the source.

WAR'S END WAR'S END

LECTION TEXT - Product | 2.11, 1 25 25, OCLOWN TEXT - Prov. crim. 1 ad water we came up have God by reason of the midega - Evident B. 20.

Today is Indipendence Day. Yet much of the world is in bondage, and the reel of it in a strucgle in pre-vent freedom from perishing from the certification. the earth,

the earth.

Cur terson too is about a nation is bondage, but we learn from it that there is a war to be live. Even my we declare the way it personal libertly which is open and free.

The Lord Jesus Christ opened it at Calvary's live and anyone who is still the bond stave of Saith may imple this a great and glorious freeependence Day by now declaring his faith in the Deliverer of our souls.

we begin today a series of tessons in the book of Exedua which reveal the high and mighty hand of God working on behalt of Ills people. The fourly of Jarob—er, as time Dible calls them, the children of israel—prospered in Egypt particularly as long as Joseph and the rulers who remembered him were allva. But they soon learned one of life's bitter lessons, that—

1. Prosperily is Nol Always a Blessing (1:6-11).

The Hebrews were a penceful, law-abiding people. They were God's chosen people, and as Hr blessed them they prospered, and thus inno-erally they brought upon theraselves the hatred of the suspicious Egyptians.

Itana,
Prosperily is never on unroixed blessing. We as a uniton know that to be true. Not only does it lead to a certain softening of the shows, but all too often it results in a weakening of the moral fiber, which makes man easy prey to the attack of the enemy of our souls.

Is it not stronge, then, that we should—even in times of all-out warrfare—bo so eager to chash the dollar that we are willing to neglect our children, forget einterh, five unnitival flyes, just that we may make more out more noncy?

The Egyptinas had, humanty

The Egyptinns had, humanly speaking, reason to fear this great notion whileh was growing up in their midst. The new rulers did not know Joseph and had forgotten the spirit in which he had brought his family late the land. The leaders of the Egyptians therefore made plans which appealed to their brilliant leaders as politic and whee. But they reckoned without God, and the hurdens and afflictions they placed on the Israellies only served to bring further blessing.

So Israel learned a lesson which The Egyptinns had,

So Israel learned n lesson which our present corry world can profit by, that-

H. Persecullan Is Not Atways a Burden (vv. 12-14),

The people of Israel did not appre-clate il, but the bilterness of their bondage was a blessing in disguise, Note that—

I. It Kepl Them Separale as a People. Afficient often serves to keep God's people separated from the world. It is doing so today.

It Disciplined Them and Prepared Them for the Hardslips of Their Wilderness Joneney. We loo do well to remember that "whom the Lord loveth he chasteneth," and that if we are properly "exercised" thereby, our serrows may yield rich fruli in our lives.

fruit in our lives.

3. If Threw Them Back upon God, Many are the saints of God who have found that the fiery trial, the burden so hard to understant, ar some affiletion of their body, has caused them to bring their burden to the Lord. We have traveled far on the road of falls when we have reached the place where we learn that "man's extremity is God's opportunity." portunity,

They had only one place in lurn, They were hearmed in an every side, but, an ever, they found that the can cluse. They called on their God.

Itl. Peager Always thrings Bellecrappe (2:23-25),

CHAPTUR X

"t had no idea where they would "t had no idea where they would be, such a explained. Bulkeley, I was sure, would take no chainers with women and a child abourd. Ot course he'd seen the Japanese signet fire the night before. Planes might be out spotting us for deartyyers, and as soon as darm broke. Bulkeley undoubtedly had unde for the nearest of those other Cuyes—picking one from his chart (we'd ne nearess of those other Cuyas— pleking one from his chart (we'd never been here before) which was surrounded by reefs and water so shallow that no desiroyer could renshallow that no destroyer could renture within sight, range or even within sight. There he would walt all day, if not until dusk, at least until he thought the denger of spotting planes was past, before coming to Join us here.

"So at 8:37 we dropped a look in the core and I sent two then eshore with semophore flags to elimb the island's single fire-hundred-foot hill and stand continuous watch—for the other three boats of course, but particularly for Japs.

"At 5:30, when we figured any spetting planes would here had to head bock for home. I was about to pull our lookouts from the hill and

pull our leokouts from the hill and get under way when they wig-wagged down that they saw a ship—apparently friendly, meybe an MTB. I pleked it up with my blooculars and presently made out the 32 boat, which soon fied up alongside us, was this boat, remember,

which had been repaired after its explosion. The cook had been blown into Sisiman Cove. During the night its struts started coming loose, so they could use only one or two of their three engines, and they like us, had lost touch with the ather beats in the night. But instead of falling far behind the flugship, they had somehow managed, in the darkness, to get out in front of it.
"In the first gray light of dawn,

"In the first gray light of dawn, their stern tookout reported a etrange ship-goining on them. Looked like a Jap destroyer. Now an MTB in good condition can outrus any warship affout. But the 32 beet was hobbling on lwo engines, so although he was running full throttle, its commander wasn't surprised that the strange craft kent galning. In orthe strange craft kept gaining. In or-der to lighten his beal and pull sway, he dumped six hundred gal-lens of gasoline in drums over the side, but still the enemy was closing on him. There seemed nothing to do now but fight before the destroyer evened with its 3-inch guns. They rendled two turpedces and turned dauntlessly for the attack, to discover just in time that the strange pursuing craft was the boni-their awn flagship with Gen-srat MacArthur shoard.

So here they were-loaded down the water line with sessick and pennied geogram. Just at this point there was a rising roar from sea-ward, and the 41 boal came around the punt, Buffeley and Generat

ward, and the 41 boal came around the pumi, Bulkeley and Generat, Mischribur's party,"
"Wa'd fast aight of you a few house before dawn," said Bulkeley, "when you stroped is clean your strainers. I went on shead because I wanted to get as d-ep as remaining the Chyn Islands bulger sup-

"This was a rendawous not only for our furn MITM's, but also for General MocArthur's accound mesna of each pe—a submortine, it ind all them carchilly worked out, and the submarine would hab up in this cova temorrow, that we been at tacked or broken down, the General could the property of the process of the

by submerine.

"General MocArthus, Admissi Rockwell and Lieutenant Bulkeley tolked about the night's plans—the edvisability of continuing with us tenight or going by submarine," went on Lieutenant Kelly, "The Admiral was for sinying with us, but the General was undecided. The effection trip had been rough, and Bulkeley had worned the night would be rougher. Yet os we lay there in the cove, the see seemed calm enough, and the sky gave no hint of bad weather. So on the ossurance of the Admiral that it would be good woather, the General de-

be good woather, the General de-elded they'd continue with us,
"Then, or Bulkeley had said,
there was the problem of whot to
do with the 32 boat, which had
dumped much of her gasoline. She
did not have enough left to make did not have enough left to make the fast rum with us to the island af Mindanao, where the General's party would get the plane for Australia. So Bulkeley gare her different orders. Het generals were to be transferred to my boot. She was to well here in the rendermous until tomor. here in the rendesirous until temorrow when the submarine arrived, She was to lell the submarine that everything had gone well, the Gen-

"They wigwagged flown that they aw a sbip-apparently friendly," eaw a ship-

eral had gone on to Mindonao and would go to Australia by plane, as planned. Having delivered this message, the 32 boal was lo go to Hollo on the island of Panay, anly one hundred and twenty miles away. There she could get repairs and enough gas to bring her on down to Castavan lo join the rest of us in Cagnyan to join the rest of us in the other three boats, and we would finish the war together in the south

naish the war together in the southern islands.

"What went wrong with this plan, we don't know to this day. The boot's rommander, Lleutenant Schumarber, must have decided that It wasn't in condition to follow these coders. Anyway, when the submatine arrived, he had it shell the \$2 boat, so it would not fall into Japanese hands, and boarded the submatine, which dropped his crew off at Carregider, and took him safely to Australia.

ty to Seele 9 Ways below 9 5 0 1 had seed the b

"t think it was the whitecaps that saved us," said Bulkeley. "The Japa didn't notice our wake, even though we were founding away of full throitie.

full throltic.
"During the excilement, the General was tring down in the cabin with his eyes closed, but Mrs. MacArthur, who was with him, heard averything limit went on and she didn't turn a hair. She took it like a lady—went right an rubbing the General's hands to keep up his circulation through the culation, though she was seastek

eulation, though she was senatek herself.

"I never went below, and all my men atoyed of bottle stations, so the peopla in the cabin took care of themselves—there was no one to wait on them. The General saw that I was supplied with eigars. They were prelly well provisioned. They'd brought from Corregidor, among other thiogs, a few cases of Coca-Cola—the first I'd lasted in many weeks—and some af the tenderest weeks-nnd some of the tenderest ham I ever ste.

ham I ever ofe.

"It got dark fast after sunset, a wind spreng up, and ahead we could see lightning flashes. But these didn't help us find the narrow passage into the Mindanao Sea. We were going in the dark entirely by dead reckening. At midnight we figured we'd be off the struke-so wa turned into the pileb-blackness, holdturned into the plich-blackness, hold turned into the pilch-blackness, hold-ing our breath, but still we didn't hit anything. I had no charts, I'd never been there before, I could see absolutely nothing, but since we didn't crash into a beach, we kept on going, and at lust I knew we were through and anfely into Min-danao Sen — our dead-reckoning danno Sen - our dend-reckoning navigation had been right."

"And there we restly cought belt," said Kelly. "Big foaming wares fifteen or Iwenly feet high thundering over the cockpil, drenehing everybody topside. Also, because of the speed, water, and wind, it got damned cold. Our binoculars were full of water and our eyes so continuously drenehed with atinging sail that we couldn't see, in ing sall that we couldn't see, in strongs waters with Islands all around us. We could see the autlines of the big oces—Negros and Mindanao—very dimiv against tha horizon through the slorm. But there were duzens af small ones and prob-

ably hundreds of reefs.

"The sea was on our port bow, tending to drive us south. We expected to make a tandfall forty miles dead ahead—a small island where we would turn—and let matell you this was an unpleasant allustion for a prayimate. ation for a navigalor. The helms-man's eyes and ours were full of man's eyes and ours were run or ault, you had to keep one hand in front of your eyes to avoid the slap-ping force of the water, and yel you needed both to bold on. The Ad-miral was prelty wrought up. 'I've needed both to bold on. The Adminial was prelly wrought up. 'I've sailed every type of ahip in the navy except one of these MTB's,' he shouted at me nbore the wind, 'and this is the worst bridge I've ever been on. I wouldn't do duty on one of these for anything in the world—you can have them.'

"It was a real problem to keep asiern lookout for the 41 boal so we wouldn't lose it. Three good warrs in a row and we'd he oul of sight, and in that weather we could pass within seventy-five yards and

sight, and in that weather we could pass within seventy-five yards and never see each other. The 41 was now keeping about two hundred yards astern, huntins for the smootheel part of our wake, to keep the General's party comfortable. The General had said that I! his boat slowed, we who were ahead should also slow, letting them set the pace. I know sensickness can be very unpleasant, but I wanted to get them safe in port by down, in case there were than plan planes about set. were Jan planes about, so I kept pulling them on, it got rougher and reugher, and the Admiral kept temembering II had been he who had assured MacArthur that Bulkeley was wrong about the weather— It would be calm.
"The General's going to give me

hell for this in the morning, he said, mosselly. Danned if I thought traineds whether what he was talking alout—but he surely did.

"The Admiral stayed with me up on the tridge the whole titl, in spile of the weather Street half-baut I would send a mounter of the strain. It is not been toping an author to see him its post one of the processing the clean neet the post of the been toping to the

LOW HACK PAIN

For many years cases for low back pain and actitive lave due to the pain in two classes lat these due to infection—tech, tonsite, gams, galt identication—tech, and the those structures are must be pain and the hip back. This is called accredition open.

During the past three ar four years we are learning that many of these cases called accredition sprain.

During the past three ar four years we are learning that many of these cases called accredition sprain are really cases where the little cushions or disk hetween the bones of the spine have been broken through or ruphired by the same type of section which causes the accredition which causes the accredition which causes the accredition of the intervertebral disk is suspected. Each spine bona is enticed a vertebra and the disk or cushion between them is an intervertebral disk.

Dr. W. E. Dandy in Annals of Surgery, Philodelphia, points out that rupture of the intervertebral disk accounts for an overwhelming percentage of the herelofore incurable and untreathble low back pains and actinicas, miscalled allow back pains and recularly all (96 per cent) of ruplured disks were altuoled between the last and second to last apine bone in lower back, the lodized oil method is not absolutely necessary, particularly because it is known that a "concealed" disk occurs in 25 per cent of coses. Dr. Dandy has been able to make the discoust of ruptured disk 63 times just by examination without use of ladized oil.

Cases of ruptured intervertebral disks are now successfully renied by operation.

However, there is the other side of this malter; that is that many palients and some physicians also, may now make the mislake of thinking that most case of low back pain a
